

MOHAMMED AHMED KHAN

Full Stack Developer (Python | React.js)

Hyderabad, Telangana | +91-9963351554 | ahmedkhanm565@gmail.com | [LinkedIn](#) | [GitHub](#)

Professional Summary

Full Stack Developer with hands-on experience across the **front-end and back-end** of the application lifecycle, using **Python, Django, FastAPI, React.js, MySQL**, and **REST API / microservices** development. Completed a 1-year Python Full Stack internship at Inspanner Academy building and deploying scalable web applications, collaborating with cross-functional teams using Git and Agile practices, and following best practices for code quality and security. Strong analytical, problem-solving, and attention-to-detail skills, with clear written and verbal communication; seeking an entry-level Full Stack Developer role to contribute to well-architected, high-performing software solutions.

Skills

- **Programming Languages:** Python, JavaScript (ES6+), SQL, HTML5, CSS3
- **Backend & Architecture:** Django, FastAPI, REST API Development, Microservices fundamentals
- **Frontend Technologies:** React.js, Bootstrap, Tailwind CSS, Framer Motion, shadcn/ui
- **Databases:** MySQL, MongoDB
- **Tools & Practices:** Git, GitHub, Docker, Postman, VS Code, CI/CD, Agile/Scrum, Code Reviews, Cross-team Collaboration
- **DevOps Fundamentals** — Git, Docker, CI/CD, Jenkins, Kubernetes, AWS basics

Experience

Python Full Stack Developer Intern — Inspanner Academy

- Completed a 1-year Python Full Stack Development internship, gaining hands-on experience designing and building scalable, high-performing solutions with **Python, Django, FastAPI, React.js, MySQL, and REST APIs**.
- Developed and deployed full-stack web applications using Django/FastAPI for the backend and React.js for the frontend, collaborating with peers to define solution designs before implementation.
- Designed and integrated **RESTful APIs** with MySQL databases for efficient data management and seamless frontend-backend communication, with attention to code quality and security.
- Implemented **user authentication and authorization** features to strengthen application security and user management.
- Collaborated using Git, GitHub, and Agile development practices, participating in code reviews and team status updates to keep priorities aligned.
- Tested, debugged, and optimized applications using Postman, improving performance and reliability ahead of demos.

Projects

DeepTraffic-VTS – Real-Time Traffic Management System | Python, Django, MySQL, React.js

- Developed a real-time traffic management system using **YOLOv8** for vehicle detection and **LSTM** for traffic flow prediction.
- Built a full-stack, scalable web application using React.js, Django REST Framework, and MySQL.
- Implemented lane-wise vehicle counting, real-time monitoring, and forecasting to support traffic analysis.
- Integrated Chart.js dashboards to visualize live data and generate analytical reports for stakeholders.

Employee Management System | Python, Django, HTML, CSS, JavaScript, SQLite

- Developed a web-based employee management system using Django with secure user authentication and an admin-friendly interface.
- Implemented employee CRUD operations, search/filter functionality, form validation, and database-backed employee records for efficient management.

Certifications & Courses

- Python Programming — OOP, file I/O, Django foundations; AI-assisted coding (AI For Techies Workshop, Mar 2026)
- Django & FastAPI — REST API development, authentication, database integration
- React.js — Component architecture, Hooks (useState, useEffect, useReducer), custom hooks
- MySQL & SQL — CRUD operations, stored procedures, indexing, normalization; AI-assisted analytics (WsCube Tech, Apr 2026)
- JavaScript ES6+ — Modules, closures, higher-order functions, async/await
- AI Tools & ChatGPT Workshop — be10x, Mar 2026

Education

B.E. – Information Technology
ISL Engineering College | Osmania University, Hyderabad

Under Graduate
GPA: 7.08 / 10.0
